### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 19 June 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Falk-4,994,024.

As to claims 1-2, Falk-'024 (Figs. 1-4) discloses rectilinear push pin 9 inserted into a recess of a rigid rectilinear casing defined by tubes 3 and 7 (Fig. 4), which casing is inserted into hollow shaft sandwiched between tube 3 and element 5, gripping members 10 & 1a, jaw members 11 & 4.

As to claim 3, Fig. 4 shows push pin 9 having a height less than the diameter of rigid casing defined by tubes 3 and 7 (Fig. 4).

As to claim 4, Falk-'024 9 discloses a pressure surface/driving element 19 on gripping member 10 for contacting a contact surface defined by a ball-shaped element at the proximal end of push pin 9.

As to claim 5, ball-shaped element and push pin 9 defines a recess engaging an element linked to gripping member 10 (Fig. 1 and 2).

As to claim 6, at least push pin 9 can be removed from hollow shaft sandwiched between tube 3 and element 5 as a unit.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Falk-4,994,024 in view of Brown et al-5,201,752.

Falk-'024 discloses substantially the claimed invention, including a recess defined by ball-shaped element and push pin 9.

Alternatively, Brown et al-'752 (Fig. 1-2) discloses a recess defined by push pin 19 at location 29 shown in Fig. 2 engaging gripping handle 21. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify push pin 9 of Falk-'024 to have a recess engaging an element linked to gripping member 10 as this configuration is just another suitable design for an engagement between the push pin 9 and the gripping element 10 of Falk-'024 device.

***Response to Arguments***

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection as indicated above.
